

PCI Design Consultant Job Posting

12.26.18

Job Summary

PCI is seeking a full-time Design Consultant to join our staff. Using their array of knowledge and technical ability, a PCI Design Consultant designs and develops a customized system to give a church the ability to function in a portable environment efficiently and effectively. Our design consultants must have a strong large venue technical and production background, and possess skills in AVL system design, environmental design, project management, and communication. They must have the ability to listen carefully and develop solutions to assist in the translation of a church's vision and needs into a portable environment, communicate clearly so that techs and non-techs are able to understand what is being created, continually update clients with accurate assessments of costs and timeframe, think critically to analyze multiple situations and problem solve, and collaborate with other professionals in the team. Frequent travel is required.

Responsibilities

- Conduct on-site and virtual design meetings with potential clients
- Design portable church solutions (including AVL systems, adult and kids environments, storage solutions, etc.)
- Manage multiple design projects simultaneously
- Generate innovative ideas
- Frequent travel

Skills

- Large venue AVL technical knowledge and system design (audio, video, lighting, and rigging)
- Excellent communication and presentation skills
- Experience working in a church environment is a plus
- Experience working with Microsoft Visio is a plus
- Organization and flexibility
- Interpersonal skills
- Strong analytical skills
- Adept learning skills
- Cooperation and willingness
- Ability to train and lead large teams
- Ability to inspire other staff members to think creatively
